Continuous Challenges for the Industry

Increased technology complexity

Increased software content

Changing resource requirements

Schedule and cost pressures

Inconsistent tech support

45%

Of customers say existing support models don't meet business needs

89%

Of customers say having access to integrated software tools would improve time to market

62%

Of customers report an incorrect setup of test instruments impact business results

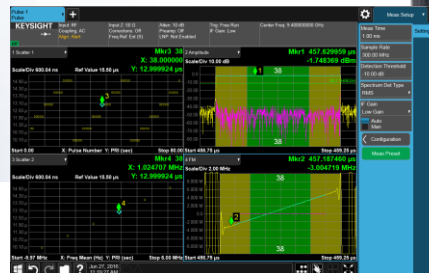

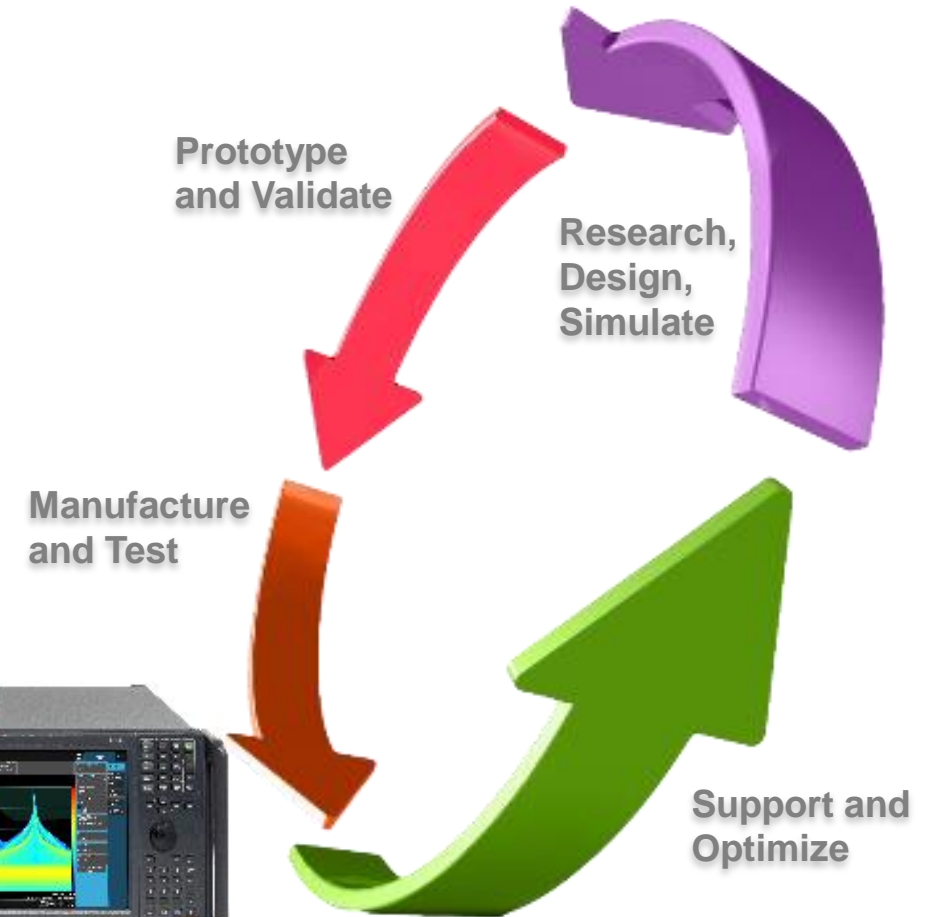

95%

Of test professionals need help every month

Drive the evolution of our software, services and support model

Keysight in Your Product Lifecycle

- Test Instruments
- Design & Test Software
- Education, Training, and Consulting Services
- Repair & Calibration Services
- Technical Support
- Hardware and Software Upgrades and Updates

Keysight Enterprise Select

For Keysight's
Most Valued
Customers !!

Typical Engagement

Single location, single site agreements

- Fragmented budget and purchasing process
- Per incident support
- Node-locked perpetual licensing
- Unpredictable spend
- Multiple contract complexity
- Technical/tactical relationship

Enterprise Select

Multi-year time-based agreement

- Subscription based access to Keysight's Software and Services portfolio
- Universal Software Access w/remix capability to accommodate demand changes and provide access to new technology
- Multi-year term with predictable spend
- Services and software under single org-wide agreement
- Strategic proactive partnership

For an annual commitment you will get what you need to get your job done

Keysight Enterprise Select

Software Offerings

Features

- Remixable to entire SW portfolio
- Access to new technologies
- Floating Licenses
- Includes software updates, upgrades, and priority support
- Predictable Fixed Costs
- Much Larger Capacity
- OPEX Accounting

Benefits

- Flexible configuration per need
- Address new design requirements
- Shareable Asset Management and provides better utilization
- Superior productivity
- Better Cost Management
- Meet all requirements thru term
- Preferred Accounting Treatment

Keysight Enterprise Select

Services Offerings

Features

- Umbrella policy - Cal/Repair for annual fee
- Predictable Fixed OPEX
- Partnership model to meet current and future roadmap
- Managed Lab offering (on-site)
- Serialized Contracts with Remix

Benefits

- Faster access to services without having to issue PO per incident
- Control and manage spending
- Increased productivity
- Focus on your core competency
- Dynamic asset list for flexibility and certainty

Keysight Enterprise Select

KeysightCare Offerings

Features

Committed TAT for repair, calibration, technical support.

Prioritized access to Keysight Application Experts, and Knowledge portal

Proactive software updates and notifications

Live local language personalized support from globally connected experts

Benefits

Reduced downtime and project delays

Lower training and hiring costs

Improved productivity

Faster support

Transition to Entitled Technical Support

Technical Support Today

Without KeysightCare¹

Best effort Technical Support, no committed response

Local business hour availability only

Publicly available self-help content

Not Applicable

With KeysightCare

As low as 2 or 4 business hour response²

Access to powerful Knowledge Center

Cloud based case and asset management

Proactive SW updates, cyber-security notification³

¹Custom support agreements may have separate SLA

² According to KeysightCare tiers Assured, Enhanced.

KeysightCare Enhanced available in US, Germany, China, Japan only

³ Requires KeysightCare Software

Transition to Entitled Technical Support

Effective March 1, 2021

Without KeysightCare¹

No Technical Support⁴

No access to Knowledge Center

Publicly available self-help content

Not Applicable

With KeysightCare

As low as 2 or 4 business hour response²

Access to powerful Knowledge Center
